

2016 Summer Yard Watering Calendar

WATER CONSERVATION TIPS:

Water your lawn every third day if needed. Use this calendar as a guide.

Mulch around plants to reduce evaporation and retain moisture.

Plant native plants. They require less water and less care.

Adjust your lawn mower to a higher setting. Taller grass blades hold moisture longer.

Find the color that corresponds with the last 2 digits of your house number:

Water every **3** days.
